

SYSPROD

- For Mainframes and UNIX/OpenVMS
- For Windows

SYSPROD for Mainframes and UNIX/OpenVMS

SYSPROD

With the SYSPROD command, you can ascertain which products are installed at your Natural site. You are given information on your current Natural version, Natural Selectable Units and products running with or under Natural.

When you enter the command, a window is displayed, listing the following information for each product installed:

- the product name,
- the product version,
- the system maintenance (SM) level,
- the installation date.

For some of the products listed, you can get additional information by marking them with a command. For a list of available commands, enter a "?" in the "Cmd" column of the SYSPROD window.

SYSPROD for Windows

SYSPROD

With the SYSPROD command, you can ascertain which products are installed at your Natural site. You are given information on your current Natural version, Natural Selectable Units and products running with or under Natural.

When you enter the command, a window displays the following information for each product installed:

- the product identification code (ID),
- the product name,
- the product version,
- the patch level,
- the installation date and time.

You can obtain more detailed information on any of the products listed by selecting "View > Detailed View" in the menu bar.
